

# PRASHITH KUMAR G

Python Full Stack Developer | Django | REST API | AWS

+91 9944786042 | prashith3@gmail.com | github.com/Prashith05 | Bengaluru, Karnataka, India.

---

## PROFILE

Results-driven Python Full Stack Developer with hands-on experience in building scalable web applications using Django, REST APIs, and SQL databases. Skilled in frontend development with JavaScript and Bootstrap, and cloud deployment using AWS. Strong problem-solving abilities with a focus on clean, efficient code. Seeking an entry-level role to apply and grow skills in full stack development.

---

## EDUCATION

|                                                                                                                          |                          |

## CERTIFICATIONS

- **Python Full Stack Development** – Pyspider (Ongoing)
  - **Front-end Development** – Alpha fly
- 

## SKILLS

**Backend:** Python, Django, REST API Development

**Frontend:** HTML, CSS, JavaScript, React.js, Bootstrap5

**Database:** MySQL, SQL

**Tools & Platforms:** Git & GitHub, Linux, Shell Scripting, AWS, PuTTY, WinSCP

---

## INTERNSHIP & TRAINING

**Python Full Stack Development in Pyspider**, Bengaluru | Jun 2025 - present

- Acquired skills in **Python, HTML, CSS, JavaScript, and SQL** for full stack web development.
- Learned back-end frameworks such as **Django** to build dynamic web applications.
- Worked on real-time projects with **database integration and CRUD operations**.

- Gained hands-on experience in **REST API development and integration** for seamless communication between front-end and back-end systems.
- Developed strong skills in **debugging, problem-solving, and software development practices**.

#### **Front-end Development in Alpha fly, Theni, Tamil Nadu | Mar 2025 – Apr 2025**

- Successfully completed training in Front-End Development with practical knowledge of modern web technologies.
  - Designed and developed responsive websites using **HTML, CSS, JavaScript, and React.js**.
  - Implemented dynamic user interfaces and improved functionality using JavaScript and React components.
  - Applied clean coding practices and debugging techniques to deliver efficient web solutions.
- 

## **PROJECTS**

### **Bus Ticket Booking Application**

**Tools:** Python, Django, MySQL, React.js, REST API

- Developed a **Bus Ticket Booking System** using **Django, Django REST API, and React.js** for seamless online reservations.
- Designed and integrated RESTful APIs for bus schedules, seat availability, booking management, and user authentication.
- Built a responsive front-end interface in **React.js** for ticket search, booking, and payment workflow.
- Implemented backend logic with Django for secure data handling, booking records, and efficient database management.

### **Django-Based Employee Management Application**

**Tools:** Python, Django, MySQL

- Engineered a localized Django-based management application featuring a custom CRUD architecture for employee lifecycles.
- Integrated Django's built-in authentication system for secure administrative access.
- Utilized ORM (Object-Relational Mapping) to handle complex data relationships between employees, roles, and performance metrics.

### **Personal Portfolio Website**

**Tools:** HTML, CSS, JavaScript

- Designed and developed a responsive personal portfolio website
- Showcased profile, skills, projects, and resume download functionality
- Implemented interactive UI features using JavaScript
- Deployed the website using Netlify Pages for live access
- <https://prashithkumar-portfolio.netlify.app>

## **AI-Based Fire-Fighting Robot with Smoke Extraction and Filtration System**

**Tools:** Arduino UNO, NodeMCU, Sensors

- Developed an autonomous fire-fighting robot using Arduino UNO and NodeMCU microcontrollers.
  - Integrated ultrasonic sensor for navigation, flame sensor for fire detection, and smoke/gas sensor for identifying poisonous gases.
  - Implemented DC fan and active carbon filter for air filtration, with motor drive for wheel control.
  - Operated in both manual and automated modes using dual microcontroller architecture.
-
